[LinkedIn](#) | [Github](#) | [Portfolio](#)

I'm an aspiring Fullstack Engineer, a former Data Professional with 3+ years of professional experience in data analytics and software development. Proven expertise in designing and implementing scalable solutions across Java and JavaScript/TypeScript ecosystems. Skilled in building end-to-end data pipelines, developing software solutions, and delivering complex data transformations. Strong track record of collaborating with cross-functional teams to deliver high-quality products and managing enterprise-level projects involving multiple stakeholders.

Experiences

Nashta Group - Depok, Indonesia

Apr 2026 - Present

Backend Developer

- Architected and implemented backend services using Golang (Gin framework) with PostgreSQL as the primary relational database, following clean architecture principles.
- Integrated GORM ORM to accelerate development with type-safe database operations, migrations, and relationship management.
- Designed and exposed RESTful APIs covering user authentication, asset tracking, and transaction management; enforced Role-Based Access Control (RBAC) across all endpoints.
- Engineered a multi-state transaction workflow system (Pending → Approved → Returned) with full timestamp tracking and soft delete support for audit compliance.
- Defined and maintained API contracts in close collaboration with the frontend team to ensure seamless end-to-end integration.

Tech Stack: Golang · Gin Framework · PostgreSQL · GORM ·

Koda Academy Trainee

Dec 2025 - Apr 2026

- Completed an intensive fullstack bootcamp covering **Go, Node.js, React.js, PostgreSQL, Docker, and CI/CD workflows**; delivered production-grade projects under time constraints.
- Built fullstack applications integrating **RESTful APIs, JWT authentication, Redis caching, ORM, and OpenAPI/Swagger documentation**.
- Applied **MVC pattern** and separation of concerns to produce modular, testable, and maintainable codebases.
- Automated deployment to VPS via **Docker Compose** and **GitHub Actions CI/CD pipelines**, reducing manual deployment steps to zero.
- **Projects:** Online Ordering Application (React.js, Golang, Node.js) · Link Shortener Application (Golang, [React.js](#))

Tech Stack: Golang · Node.js · React.js · PostgreSQL · Redis · Docker · GitHub Actions · Swagger

PT Smooets Teknologi Outsourcing
Software Engineer

Jan 2025 – Dec 2025

- Designed and developed new **RESTful APIs** and enhanced existing endpoints using **Java (Spring Boot)** and **TypeScript** to meet evolving product requirements.
- Diagnosed and resolved critical production bugs through systematic **debugging and root-cause analysis**, ensuring optimal application performance and uptime.
- Led frontend development using **React.js and Next.js**, delivering responsive, accessible, and performance-optimized user interfaces.
- Implemented **AI-powered automation workflows** using **n8n**, integrating third-party services to streamline business processes and reduce manual overhead.

Tech Stack: Java · Spring Boot · TypeScript · React.js · Next.js · n8n

IYKRA - Jakarta, Indonesia
Project Manager/Trainer Assistance

May 2024 – Aug 2024

- Facilitated training sessions by preparing learning materials and assessments, ensuring smooth curriculum delivery.
- Served as the primary communication liaison between trainers, participants, and external stakeholders.
- Produced structured reports and technical documentation aligned with project timelines and deliverables.

Otoritas Jasa Keuangan - Jakarta, Indonesia

Feb 2023 – Dec 2023

Research Assistance

- Prepared Business Requirements Documentation (BRD) and Functional Specification Documents (FSD) for enterprise initiatives
- Designed and prototyped graph network architecture using Neo4j for financial relationship mapping
- Participated in multiple stakeholder meetings and documented meeting minutes and action items
- Analyzed and mapped metadata documents into integrated metadata systems
- Conducted User Acceptance Testing (UAT) and System Integration Testing (SIT) for enterprise data warehouse implementation

PT All Data International - Jakarta, Indonesia

Sep 2022 – Feb 2023

Data Visualization Engineer

- Designed and developed 2 comprehensive dashboards from requirements gathering through deployment
- Analyzed data sources and created detailed data flow diagrams and technical process documentation
- Created 12 scorecards with dual growth indicators using advanced filtering and drill-down capabilities
- Developed complex visualizations (line charts, bar charts, pie charts) with multi-layered filtering and parameters
- Conducted training sessions and presentations to stakeholders on dashboard features and functionality

Education

Universitas Indonesia - Depok, Indonesia

Aug 2017 - Aug 2021

Islamic Economics

- Represented Faculty in IESCO 2020
- Represented Faculty in OIM UI 2020
- Participated in The 2021 SMICIE: SEBELAS MARET INTERNATIONAL CONFERENCE ON ISLAMIC ECONOMICS
- Participated in various organizational and volunteering activities

SKILL

Frontend Development – React.js, Next.js, Redux, React Query, Tailwind CSS, Material UI, HTML5, CSS3, JavaScript (ES6+), TypeScript, Responsive Design, Webpack, Vite

Backend Development – Golang, Gin, REST API, Clean Architecture, Middleware, JWT Auth, Database Integration

Database – PostgreSQL, Redis, GORM, SQL Optimization

DevOps & Deployment – Docker, Docker Compose, CI/CD (GitHub Actions, GitLab CI), Linux CLI,

Testing – Unit Testing (React Testing Library, Jest), Integration Testing (Postman, Go test),

API Design – RESTful API, gRPC, OpenAPI/Swagger Documentation

Version Control – Git, GitHub, GitLab, Git Flow

Project Management – Agile/Scrum, Jira, Trello, Notion, Technical Documentation

Cloud & Hosting – AWS (EC2, S3, RDS), Vercel, Railway, Firebase

Security & Best Practices – Input Validation, HTTPS, OAuth2, JWT, CORS
